

FIBER **FRAME**
TM

Technical drawing of a rectangular table top. The overall dimensions are 70" wide by 46" high. The drawing shows a gray rectangular area representing the "LIVE AREA". There are 12 grommets (circles) arranged in a 3x4 grid. The dimensions are labeled as follows:

- Overall width: 70"
- Overall height: 46"
- Horizontal spacing between grommets: 23" (between the first and second columns), 24" (between the second and third columns), and 23" (between the third and fourth columns).
- Vertical spacing between grommets: 15" (between the first and second rows), 16" (between the second and third rows), and 15" (between the third and fourth rows).

Legend:

- GROMMET
- LIVE AREA

FINISHING SPECIFICATIONS

Build @ 300dpi at actual size
Finished/Overall area: 46" x 70"

Material/Substrate:
The Fiber-Frame is not rated for use with grommets or lightweight polyethylene substrates

Inks must be weatherproof/waterproof with sufficient UV protection.

Refer to the diagram above for the placement of the grommets.

Hold your design in approximately one inch away from the edge so it is not interrupted by the grommet placement.

1" hem all sides.

Corner grommets inset at minimum 1/2" on the center line from the edge.
